

Environmental policy

At Terrats Medical Group, we are aware of the importance of environmental preservation and we take it as a challenge. The main objective of this policy is to carry out our activity within the parameters of sustainable development. The company will guide its operations and decision making by taking into account the following essential elements, which are listed below:

- I. To strive for Environmental Protection, based on the company's risk analysis. This makes it possible to identify the main factors of concern and to focus on mitigating and eradicating the impact where possible.
- II. To promote environmental culture, working to involve stakeholders, encouraging their active participation, in order to reach a common commitment to continuous improvement.
- III. Prevention and control of pollution in our processes, placing special emphasis on appropriate waste management.
- IV. To comply with legislation and adapt to current environmental standards, as well as quality standards established in our sector.
- V. To establish an action plan with objectives and indicators, which will allow us to monitor our impact and follow up to ensure continuous improvement.
- VI. To pursue the sustainable and efficient use of resources through responsible consumption of water and energy, committing wherever possible to the use of renewable energies.
- VII. To define an objective to measure greenhouse gas emissions in order to reduce and compensate for our carbon footprint.
- VIII. Implementation of the environmental policy in all the companies that make up our business group, incorporating the corporate principles in the first year of belonging to the group.
- IX. To promote environmental training and communication, encouraging and strengthening best practices.

Terrats Medical Board of Directors is committed to promote the development and the necessary means to carry out all the mentioned actions, in order to ensure the success of the environmental improvement.
